

LEVELS OF QUALITY

The lubricant Italub STS PLUS MIX 2T complies with the following international specifications:

- API TC
- JASO FC

DESCRIPTION

The lubricant Italub STS PLUS MIX 2T can be used in motorcycle and scooter engines with automatic or separate blending. Furthermore, it can be used in two-stroke engines installed on agricultural machineries and in two-stroke engines of mowers and motor saws.

The special additives used offer a good scratch protection of pistons, an effective anti-wear action and a good protection against spark plug clogs.

APPLICATIONS

Its specific formulation ensures a perfect lubricant leakage inside lead-free petrol engines, by improving the combustion and the efficiency of the engine.

The following benefits can be obtained if you use this product:

- reduction in smokes coming from the exhaust pipe.
- a higher engine cleaning.

TYPICAL FEATURES

Density at 15°C.Kg./dm3	ASTM D1298	0.860
Viscosity at 100°C.cSt	ASTM D445	11.0
Colour	visual	red
Flammability V.A.°C	ASTM D92	200
Pour Point °C	ASTM D97	-9

The above mentioned values are indicative of production average values and are not an integral part of the specification.
