

# CYRCOL

REV.2 OF 03/2023

## LEVELS OF QUALITY

The lubricants of the CYRCOL comply with the following levels of quality:

- ISO 3448
- DIN 51524 HM

## DESCRIPTION

Oils of the series CYRCOL which are designed for the use in oil hydraulic systems are recommended for the lubrication of different machineries and are successfully used both as cooling oils and process oils.

They are also suitable for the lubrication of reducers and of moderately loaded gear drives.

Furthermore, they are used for the lubrication of reciprocating air compressors, whenever non-detergent oils with low deposit-forming tendencies are required.

## TYPICAL FEATURES\*

ISO VG	32	46	68
Density at 15°C.Kg./dm <sup>3</sup> ASTM D1298	0.860	0.860	0.860
Viscosity at 40°C.cSt ASTM D445	28.8 to 35.2	41.4 a 50.6	61.2 a 74.8
Viscosity at 100°C.cSt ASTM D445	5.7	7.6	10
Viscosity Index ASTM D2270	120	120	120
Flammability V.A.°C ASTM D92	195	195	210
Pour Point °C ASTM D97	-15	-15	-15
